# Kick Start

## Colostrum Supplement for Calves

### *Directions*

This applies to all domestic animals including horses, alpacas, cows, sheep, goats, pigs & deer.

**Kick Start** should be fed as soon as possible after birth, and preferably before milk is fed. **Kick Start** can be absorbed for up to 48 hours after birth, depending on the species. Weigh the animal and select the appropriate weight range from the chart. Mix the amounts of **Kick Start** powder and warm pre-boiled water to make the daily **Kick Start** requirement. Refrigerate prepared **Kick Start** for one day only or store frozen in ice cube trays for up to 1 month.

***Do not mix or feed Kick Start with milk.***

### *Newborns that have not received maternal colostrum or milk.*

**First 12 hours:** Do not feed milk during this time. Prepare a daily dose of **Kick Start** as described above and feed 1/4 of the amount every 2 hours.

**Next 36 hours:** Commence feeding milk every 4 hours. Prepare a daily dose of **Kick Start** as described above and feed 1/4 of the amount every 4 hours. Feed **Kick Start** 2 hours after the first milk feed so that the remaining **Kick Start** feeds are mid way between the next milk feeds.

### *Newborns that have received some milk but no maternal colostrum.*

**First 12 hours:** Stop feeding milk. Prepare a daily dose of **Kick Start** as described above and feed 1/4 of the amount every 2 hours.

**Next 36 hours:** Recommence feeding milk. Prepare a daily dose of **Kick Start** as described above and feed 1/4 of the amount mid way between milk feeds.
